muskangujar.vercel.app

Junior Developer specializing in AI & Machine Learning — experienced in developing and evaluating NLP prototypes, integrating Large Language Model (LLM) APIs with precise prompt engineering, implementing RAG architectures, and deploying models into production using Docker & CI/CD workflows.

EXPERIENCE

Associate Engineer

· NielsenIQ (NIQ)

- Managed BAU cloud operations and supported system health monitoring across **AWS, Azure, and GCP** environments, ensuring 99.9% system uptime.
- Integrated **LLM capabilities** (prompt engineering, API interaction, vector embeddings) for semantic analysis, classification, and text preprocessing of unstructured logs and system diagnostic files.
- Utilized **NLP and Optical Character Recognition (OCR)** workflows to parse, clean, and extract metadata from document formats and system logs.
- Collaborated with senior engineers and data scientists to design context-aware diagnostic workflows, translating operational requirements into clean Python code and system upgrades.
- Actively participated in code reviews, utilizing **Git** for version control and ensuring adherence to performance and reliability standards.

AI Research Assistant

· Academic Research

- Curated, cleaned, and preprocessed high-quality datasets of 10,000+ samples to prepare data for robust model training.
- Optimized hybrid neural networks (CNN-LSTM) using **PyTorch**, improving classification accuracy by **12%**.
- Rapidly built and iterated on AI/ML prototypes to evaluate training convergence, benchmark performance, and demonstrate solution feasibility.

Intern — Engineering

· NEC Program

- Configured cloud monitoring alerts and dashboards using **Prometheus, Grafana, and Datadog** to support production observability.
- Supported release pipelines, verified dockerized services, and wrote automated unit and integration tests using **PyTest** to ensure code quality.

FEATURED PROJECTS

AgentMem

Rust · Python · CrewAI · LangGraph · LangChain

Production-ready long-term memory engine for AI agents. Replaces fragile prompt engineering with a typed context retrieval architecture. Python SDK integrates with **LangGraph, CrewAI**, and **LangChain** to handle time-aware context fetching and state management. · github.com/Muskangujar/AgentMem

AgentID

Rust · Python · Ed25519 · Cryptography · gRPC

Cryptographic identity layer for production AI agents. Issues compact, offline-verifiable 173-byte tokens using **Ed25519** signatures, eliminating hardcoded API keys in multi-agent workflows. Includes multi-language SDKs (Python, TS) and a CLI vault.

Agentool **UPCOMING**

Python · OpenAPI · MCP · Schema Inference

Universal API translator for AI agents — parses **OpenAPI specs**, crawls documentation, and automatically infers schemas to generate tool definitions with auth injection and **MCP** compatibility.

TECHNICAL SKILLS

MACHINE LEARNING & AI

Model Training · Model Evaluation · Rapid Prototyping · PyTorch · Scikit-Learn · Traditional ML (Regression, Classification)

NLP & SPECIALIZED AI

Natural Language Processing (NLP) · Optical Character Recognition (OCR) · BERT · HuggingFace Transformers · Text Preprocessing

LLMS & PROMPTING

LLM API Interaction · Prompt Engineering · Retrieval-Augmented Generation (RAG) · LangGraph · LangChain · Vector Embeddings

LANGUAGES & CORE DEV

Python (OOP, Async) · REST APIs · SQL · Go · Git Version Control · Code Reviews · Shell Scripting

TESTING & DEVOPS

Dockerization · CI/CD (GitHub Actions) · PyTest · unittest · Integration Testing · Linux · Cloud (AWS, Azure, GCP)

VECTOR & GRAPH DBS

Pinecone · pgvector · OpenSearch · Neo4j

CORE CAPABILITIES

AI/ML MODEL DEVELOPMENT

Building, training, and evaluating ML and specialized AI (NLP, OCR) models from initial dataset preprocessing to deployment.

PROMPT & RAG ENGINEERING

Interacting with LLM APIs, crafting precise prompts, and designing Retrieval-Augmented Generation (RAG) architectures.

QUALITY & DEVOPS DISCIPLINE

Writing comprehensive unit/integration tests and deploying services using containerization (Docker) and automated CI/CD pipelines.

EDUCATION

B.E. Electronics & Telecom

Savitribai Phule Pune University
First Class with Distinction
